

Vital genomic information to support your complex breast cancer treatment decisions.

Four validated reasons for choosing SYMPHONY™.

1. Comprehensive breast tumor profiling.

SYMPHONY consists of four unique assays that support your treatment decisions with comprehensive genomic profiles:

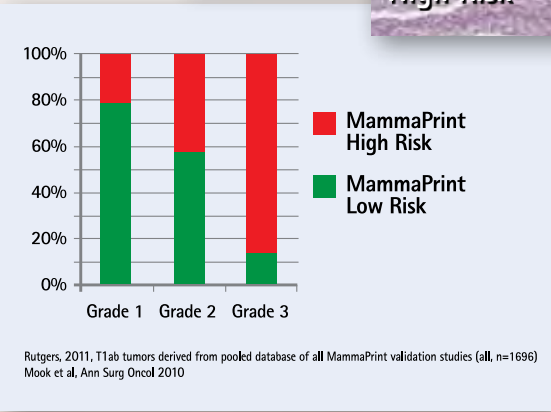

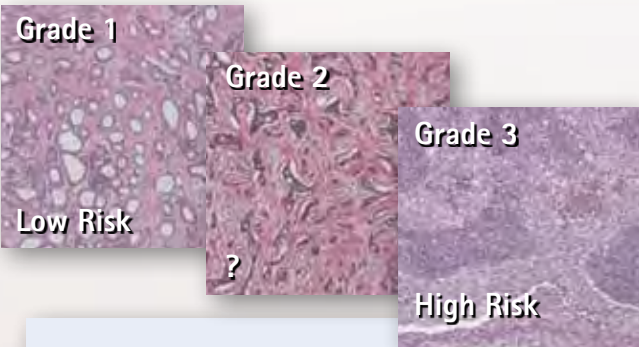

- ♪ MammaPrint® is a prognostic test designed to help you determine the risk of recurrence, giving you a definitive "yes/no" answer to chemotherapy decisions.
- ♪ Blueprint™ identifies molecular subtypes to help you select therapies with the best clinical outcomes.
- ♪ TargetPrint® utilizes mRNA to confirm receptor status for ER, PR and HER2 to help guide hormonal therapy.
- ♪ TheraPrint® provides gene expression for 56 genes that have published correlation to therapy response in metastatic disease.

Collectively, SYMPHONY provides you with the most complete breast cancer tumor profiling resource on the market today.

2. Specific guidance for "Indeterminate" cases.

The SYMPHONY profile delivers critical, clinically relevant data to guide treatment decisions. This is true even for cases that have been otherwise classified as "Indeterminate," such as grade 2. This exclusive SYMPHONY feature provides vital information you won't find anywhere else.

Histological grading was centrally reviewed for all patients.

3. 100% definitive results every time.

SYMPHONY signatures were developed by analyzing all 25,000 genes of the human genome to identify those genes that regulate breast cancer, including genes in each of the 7 metastatic pathways. Over 5,000 patients included in 22 studies worldwide have validated the clinical utility of our assays. You will receive a clear, accurate result each and every time you order SYMPHONY.

4. Unmatched convenience.

The SYMPHONY profile combines Agendia's unique, pure biology with the convenience of using paraffin embedded tissue. Our advanced, microarray technology runs every SYMPHONY assay on a single chip – simultaneously. "On Demand" testing services provide the flexibility to order additional assays and receive test information in under an hour – for faster treatment decisions. And, our new OncoBank service enables you to store your patients' tissue indefinitely for future testing needs. Plus, you'll have the added efficiency and convenience of online ordering.

For breast cancer treatment information that works in concert with the way you practice, find out more about SYMPHONY. And simplify even the most complex therapy decisions with the utmost confidence.
